SUMMARY

Motivated Computer Science and Engineering student with a strong foundation in C, Python, and MySQL. Completed a Data Science internship with hands-on experience in data analysis and predictive modeling. Passionate about learning new technologies, solving real-world problems, and building a successful career in software development and data-driven applications.

EXPERIENCE

Data Science Intern (Virtual Internship)

Aenexz **July 2026 - August 2026, Remote**

- Developed a Linear Regression model using Python to predict diabetes progression from clinical data.
- Analyzed a dataset containing 442 patient records and 10 medical features for predictive modeling.
- Performed data preprocessing, feature analysis, and model evaluation using machine learning techniques.
- Applied regression metrics to assess model performance and improve prediction accuracy.
- Gained hands-on experience in Python, data analysis, and machine learning workflows.
- Created detailed data visualizations using matplotlib and seaborn to illustrate key trends and communicate insights from medical feature correlations to the project mentor team.

EDUCATION

SSC

Sri Chaitanya School • 86.66%

B.Tech Computer Science and Engineering

GITAM University • Vishakapatnam

- 3rd Year

SSC

Sri Chaitanya School • Vishakapatnam • 2022 • 86.66%

SKILLS

Skills 0: MySQL Database, MySQL Database, MySQL Database
